TAC List

STOA's list of authenticated Tigers is available for review by members of STOA. The table is sortable by column as well as searchable. You can search on Certificate, VIN, and State fields individually or in logical "AND" combination (i.e. VIN AND State match). The search is a "begins with" search and will display results in order found in the database. The State is the State the car is registered to at the the time of inspection. If you have any questions of comments about the list please contact the TAC Chairman (but before you do, please check your entry!). *Note: This database is current as of June 8, 2020*

A TAC Lookup uses "starts with" search so exact entries are not required. For example, VIN "B3820018" will produce a hit, displaying all VINs between B382001800 and B382001899. Search results can be filtered on any of the fields listed. The search is not case sensitive. If you believe that your search results of "no record found" was in error, please contact the TAC Chairman.
